Date: 5/3/2016 Status: Inspection Author: Souder, Taylor

Updated Oil Volume:

Updated Salt Water Volume:

Updated Other Volume:

Updated Other Contaminant

Notes:

I arrived on location at 1800. Oil had misted off the pad near the treaters. Oil staining visible along grassland on west side of pad. Oil residue was also found off of the north side of the pad. Oil staining reached a small wetland area surrounded by birch trees. The wetland was mostly dried up, but I was able to get some water samples. I did not see any oil sheen in the water. Group 190 and diesel range organics (DRO) samples were taken, and a chloride strip test resulted in a non-detect. There is a larger pond behind this wetland, but it sustained no oil impacts. Further cleanup needed.

Date: 5/17/2016 Status: Inspection Author: Stockdill, Scott
